

RWDC Teachers and Students.

NASA Space Grant Universities may be a source of funding for your RWDC National registration fee. They support Science, Technology, Engineering & Mathematics (STEM) Education. They provide grants to schools in their states. You should contact the representative in your state to explore funding possibilities. They will probably require that you send them a proposal. Contact them by phone first to explore interest. They are required by NASA to match the money they receive from NASA, which they provide as grants. When talking with them, tell them that you have a donation of \$1 million in professional engineering software that can be used for the matching requirement and you may be eligible to get matching support from the RWDC for the registration fee.
